

BCA Circular 5/2025

Project Supervisor

With reference to the recent changes in the Occupational Health and Safety Authority (OHSA), as from the 17th of September 2025, the client is required to submit the details of the Project Supervisor (Health and Safety Officer) directly to OHSA. The Perit in charge of the project should submit the Site Management Responsibility Form in full excluding the Project Supervisor.

This new procedure is in line with the revised legislation of the Occupational Health and Safety Authority (Legal notice 52 of 2025 of Subsidiary Legislation 646.27). For reference, the new legislation can be accessed through this link:

<https://legislation.mt/eli/sl/646.27/eng>.

Through this legislation the project supervisor shall coordinate the implementation of regulation 7.

Therefore, as from the 18th of September the dropdown, for Project Supervisor, in the BCA Digital Responsibility Form will no longer be available.

For any information or guidance kindly contact the Occupational Health and Safety Authority.
