

# IRRINOVA DAREK 2025

## Notice of Clarification

In reference to Article 2.2 of the Grant Agreement of the 'Irrinova Darek' Scheme kindly note the below clarification and must be read and construed in the context of the whole agreement.

### Eligible Cost Amount (including VAT)

The amount in Euros (€), including VAT, as stated in Article 2.2, represents the approved grant amount eligible for reimbursement to the Beneficiary, calculated after application of the applicable co-funding rate under the Scheme (i.e. 75% or 90% as applicable) to the total value of eligible BOQ items submitted by the Beneficiary.

For the avoidance of doubt, the amount stated in Article 2.2 is the maximum reimbursable grant contribution derived from that eligible cost base following application of the applicable co-funding rate. Accordingly, no further percentage reduction or deduction shall be applied to this approved grant amount unless otherwise provided for under the Grant Agreement.

This is without prejudice to any other provisions of the Grant Agreement, including those relating to verification, eligibility, compliance, and supporting documentation, which may affect the final disbursement of funds.

### Practical Implications

In practice, reimbursement can only be assessed in respect of items listed in the BOQ, up to the eligible total stated in Article 2.2 (subject to any other scheme caps/ percentages). Any additional items, variations or cost increases that fall outside the BOQ remain the Beneficiary's responsibility unless the scheme formally allows and approves an amendment in writing.
